

Can anybody take your peptide
from synthesis to scale-up and GMP
manufacturing—reliably? **We can.**

Peptides are our business. That's why we understand how success in synthesizing a high-purity peptide API is just the first step in an often-challenging journey. You'll need a partner who can scale up new, complex chemical entities. One who can guide you through FDA approval. A partner with a track record of excellence in GMP manufacturing—and a strategic interest in your long-term success. Let us give your next project the edge. Find out more today at polypeptide.com.

PolyPeptide Laboratories. Your professional peptide partner.
